PROFILE

Introduction:

My name is Albert Sezkir, and I am 38 years old. I'm originally from Landskrona and have been living in Stockholm for the past nine years. I'm fluent in Swedish, English, and Turkish, and I am currently studying Spanish.

I have a background in Business Studies from Landskrona and am known for my attention to detail, punctuality, reliability, and putting people first. I'm fully committed to giving my best in any future internship or role at your company.

Current Situation and Career Transition:

Currently, I'm a part firefighter at the Sollentuna Fire Station, a position I have held for nearly ten years & landed a fulltime role as a Software Developer at Söderberg & Partners following a successful internship there.

This career shift is driven by a long-standing passion for computers and technology. I am continuously expanding my expertise in full-stack development—focusing on JavaScript, React, Node.js, and backend development using C# and .NET Core—with the goal of becoming a well-rounded Full-Stack Developer.

In May 2025, I graduated from KYH Liljeholmen as a JavaScript Front-End Developer. I am now actively seeking a position as a Software Developer where I can apply my skills, take on new challenges, and continue growing professionally.

I'm currently working on two ongoing projects.

The first project involves modernizing an internal salary administration system originally built with legacy .NET technologies. My role focuses on migrating the old ASP.NET pages to a modern stack using React, .NET Core (C#), TypeScript, Ant Design, Azure, and Microsoft SQL Server.

The second project is a client-facing platform used by Söderberg & Partners' customers to manage their salary reports. In this project, I am responsible for frontend development using React and TypeScript, while also contributing to the backend in C# and .NET Core. My work includes implementing design updates and resolving existing bugs to improve overall system performance and usability.

I hope this letter has captured your interest, and I look forward to the possibility of working with you.

Best regards

Albert
